### CALL FOR PAPERS

The Rimini Centre for Economic Analysis (RCEA) invites papers to be considered for its 10th Macro, Money and Finance Conference “**Is a Recession Coming?**”.

The current macroeconomic situation indicates a growing possibility of a recession. Economic growth has slowed down in Europe and China and is likely to slow down in the US once the stimulative effect of tax cuts passes. Combined with the tariff war between US and China, erratic economic policies in some countries and financial markets volatility, a recession in the next two years is more likely than it appeared a year ago. The current situation makes dealing with the next recession a formidable challenge: interest rates are low, public debts are high and some macroprudential reforms introduced in the wake of the Great Recession have been rolled back.

The goal of the conference is to assemble a group of leading researchers in macroeconomics, monetary economics and finance to present and discuss their recent work. While the focus of the conference is on theoretical and empirical work related to macro prospects, we welcome papers in all areas of economics and finance related to the overarching theme of the conference.

### KEYNOTE SPEAKERS

Emmanuel Farhi is a professor of Economics at Harvard University. His research focuses on macro-economics, finance, international economics, and public finance. He was awarded the 2009 Bernacèr Prize for the best European economist under the age of 40 by the Observatory of the European Central Bank, and in 2014 he was named one of the 25 best economists under 45 by the IMF.

Enrique G. Mendoza is the Presidential Professor of Economics at the University of Pennsylvania and the Director of the Penn Institute for Economic Research. His research focuses on international macroeconomics, macroprudential regulation, financial crises and fiscal policy. He has written extensively on macroprudential policies, sudden stops, sovereign default and sustainability of fiscal policies.

## ABOUT RCEA
