About the Research Centre for Economic Analysis

The Research Centre for Economic Analysis (RCEA) is a non-profit, non-partisan organization dedicated to the advancement of research in economics and other social sciences. It is an international centre with chapters in Canada, at Wilfrid Laurier University in Waterloo, Ontario; in Poland, at the University of Warsaw and in Italy, at the University of Siena.

RCEA envisions to become a network of academics and policymakers who collaborate to apply cutting-edge theoretical and empirical research relevant to economic policy. The centre welcomes diverse views on how to realize this goal. RCEA sponsors high quality research linkages in both interdisciplinary and international dimensions. We encourage long-term affiliation with the centre, and we especially encourage participation of graduate students. The centre strongly supports the active involvement of graduate students and new PhDs.

To achieve these goals, RCEA organizes conferences, webinars and seminars at which leading economists, policymakers, industry practitioners, students, and other scholars can exchange and develop new insights and ideas. We are committed to the unrestricted exchange of research results and ideas, and our work is freely available online. Through outreach activities, we disseminate the results of our members’ research to the decision makers and the general public.

RCEA official journal is the Review of Economic Analysis (REA). Review of Economic Analysis is an open access, ABDC-ranked, peer-reviewed quarterly publication. RCEA aims to promote its further development as a top open access, general interest journal in the profession.

RCEA is generously supported by Wilfrid Laurier University and by the Lazaridis School of Business and Economics.
